RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 72 pages. Original publisher: Orlando, FL : Simulator Systems Research Unit, U. S. Army Research Institute for the Behavioral and Social Sciences, 2007 OCLC Number: (OCoLC)227350128 Subject: Military education -- United States. Excerpt: . . . may be a concern given scaling issues, the relative relationships of objects and distances between them should accurately transfer from one environment to the other when evaluating transfer of training. Banker (1997) compared three types of navigation training: map study, VE combined with map study, and study in the actual environment, and found that the participants navigational ability had more of an effect on performance than the training condition. However, within the treatment groups those with intermediate navigational skills benefited the most from exposure to VE. Beginners appeared to be overloaded with information, while experienced navigators used the VE to pinpoint specific locations or waypoints. This study has some minor limitations (e. g. , small sample size), but navigation training in VE may still be advantageous over study of a paper map alone in many situations. The complexity of the environment and path to traverse may make a...
