0.1in. Although the number of Christmas tree fires is low, these fires carry a higher level of hazard than other fires that occur in a residential structure. This study, supported by the U. S. Fire Administration, has the following three objectives: 1)

characterize the heat release rate of dry Fraser fir trees 2)

demonstrate the ignition resistance of a tree with a high moisture content and 3) examine the impact of a residential sprinkler on the heat release rate of a dry tree that is on fire in a compartment. This item ships from La Vergne, TN.
